Meet Powerwall 3

Powerwall 3 is an advanced home energy system that combines solar power and battery storage into one seamless solution.

Designed by Tesla, Powerwall 3 integrates directly with solar systems and delivers reliable performance through a single, efficient unit. With up to 11.5 kW of continuous power and the ability to support high-demand appliances, it can power most homes with ease.

It allows you to generate, store, and use your own energy giving you greater control over how your home is powered.

Energy, On your Terms

Powerwall 3 gives you energy security, independence, and long-term savings.

- Backup power during outages
- Reduced electricity costs
- Energy independence from the grid
- Smart control through the Tesla App
- Scalable for future needs

Whether you're preparing for outages or optimizing your energy usage, Powerwall 3 helps you stay powered at all times.
