UNIVERSAL WALL CONNECTOR

Effortless EV Charging

The Tesla Universal Wall Connector is a fast, reliable charging solution designed for everyday convenience at home or business.

It delivers efficient overnight charging, allowing you to start each day with a fully charged vehicle. Compatible with both Tesla and non-Tesla electric vehicles, it integrates multiple charging standards into one streamlined system.

Designed for Everyday Use

- Charge overnight and start your day ready
- Up to 44 miles of range per hour of charge
- Compatible with Tesla and other EV brands
- Control and monitor from the Tesla App
- Clean, compact design for indoor or outdoor installation
- Built for reliable performance in any environment

Installed by Experts

ECE delivers complete charging solutions not just installations.

We ensure your system is safely installed, optimized for your electrical setup, and ready to perform from day one. Our team brings certified expertise, precision, and dependable service to every project.

Let's Get Started

Take the next step toward smarter, more convenient charging.
